Laying Patterns

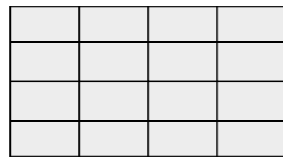

OUR MOST POPULAR PATTERNS

There are a wide range of laying patterns available for Paving Flags and Block Paving. The most commonly used for Tobermore products are **Herringbone**, **Stack Bond**, **Stretcher Bond**, **Basket Weave**, **Soldier Course** and **Random pattern**. All of our Paving Flags can be laid to the Stretcher Bond, Random and Stack Bond patterns. We advise that *Tegula*, *Shannon* and *Sienna* block paving is laid in a Stretcher Bond pattern.

Design Services

We have developed a range of design services to help you create the perfect outdoor area

Paving Creator

Paving Creator is a free online tool which allows you to select Tobermore products and view how these look in various garden or driveway scenes. Simply select the type of project you are considering (patio or driveway), pick the products you like and select an outdoor scene. You will be able to view lots of different products to help you decide which will suit your project best.

Landscape Design

We have created a range of landscape design packages to suit all sizes of projects and budgets; whether you have a large garden and driveway in need of some inspiration or you have a small outdoor area to transform for your children to play, our designers will help turn these ideas into reality.

Paving Visualise

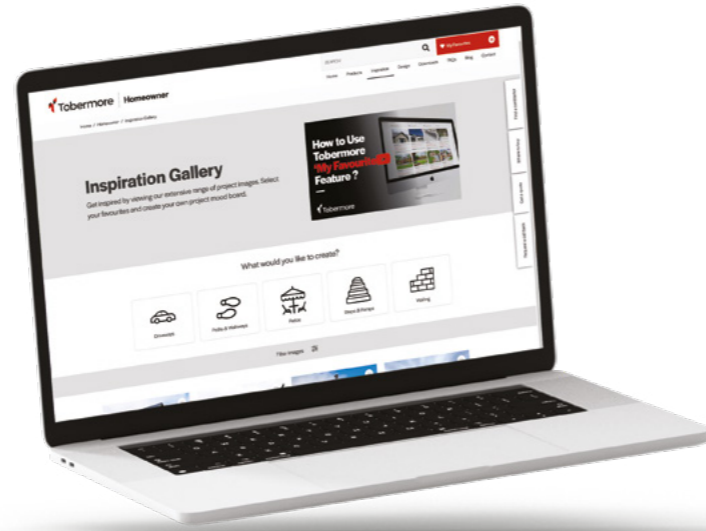

If you can't decide which Tobermore products you would like to use on your project, our Paving Visualise Service can help. Our experts can provide you with a visualisation of what your favourite Tobermore products could look like at your own home.

The Process

Be Inspired

Check out our project inspiration gallery

Our Inspiration Gallery now has the addition of a 'My Favourites' feature, this allows you to filter your favourite Tobermore projects and create your own project mood board to save or share with a friend.

Choose Tobermore

At Tobermore, we take pride in the outstanding performance of our products.

PrimeTop

Is the name we have given to the premium hard wearing surface layer on our products. This gives Tobermore products significant performance benefits.

Ef-Stop

During manufacturing, we cure our products in a warm vapour which virtually eliminates efflorescence.
